This map shows portage maintenance by Quetico Park crews. Due to wind and storms, portage conditions can change suddenly. This map is a guide only. Maintained means that portages have been cleared of major trees across the trail. Brushing is done as time allows. Due to a late season forest fire in Aug/Sept 2018, Bonhomme and Sauvage Portages are closed to all travel and camping until park maintenance crews can re-establish the portages.
